EDUCATION

Florida International University

Miami, FL

B.Sc., Biomedical Engineering (Concentration in Biomaterials and Biomechanics)

- Dean's List, OURS(Opportunities for Undergraduate Research and Scholarship) and CURE (Coulter Undergraduate Research Excellence Program) Scholar.

WORK EXPERIENCE

SHL Medical Deerfield Beach, FL

Dec 2025 – Present

Analytical Sciences Engineer

- Manage customer-facing stability testing programs, protocol and report writing, and cross-functional project coordination across multiple accounts for autoinjector combination products.
- Author and execute deviation documentation for regulated stability and testing programs, ensuring findings are investigated and closed per ISO 13485 and 21 CFR 820 under Polaroid and Teamcenter Electronic Quality management system softwares.
- Conduct research and lead internal training on ISO 11040-8 and USP <382> leak-testing methodology to strengthen test method development.
- Drive a revenue recovery initiative by improving protocol and report turnaround time across customer accounts.
- Implement and manage change control for work instructions and forms in Teamcenter, including cross-team training on updated procedures.
- Lead investigations into out-of-specification (OOS) results and test failures for autoinjector combination products using Polarion.
- Designed and implemented a billing-tracking system to capture and centralize all information needed to initiate customer billing; recovered and billed over \$1M in current and previously unbilled POs as a result.
- Trained all Analytical Sciences team members on the new billing system, including how to track billing milestones and initiate customer billing.
- Proficient in mechanical and package-integrity testing using Instron and CCIT (container closure integrity testing) equipment.
- Perform Test Method Validation (TMV), Test Method Development (TMD), and Test Method Transfer (TMT) to support qualified, reproducible test methods across programs.

Integer (Previously InNeuroCo) Pembroke Pines, FL

Jul. 2024 – Aug 2025

Quality Engineer

- Served as SME in company-wide QMS transition to ETQ Reliance, authoring and reviewing protocols, training staff, and ensuring FDA 21 CFR 820 and ISO 13485 compliance.
- Lead installation qualification (IQ), software validation, and cross-functional validation activities, supporting process and product compliance through design transfer and lifecycle management.
- Prepare and maintain validation documentation for internal, supplier, and FDA/ISO audits, addressing findings to ensure regulatory readiness.
- Support investigations (CAPAs, NCRs, SCARs, deviations), performing root cause analysis and driving continuous improvement.

InNeuroCo Pembroke Pines, FL

Jul. 2023 – Jul 2024

Manufacturing Engineer-Internship

- Executed validation protocols (IQ, OQ), FMEA, and CAPA to support compliant manufacturing of neurovascular catheter devices.
- Drafted and executed validation documents (work instructions, protocols, reports) in collaboration with R&D, Quality, and Regulatory teams.
- Conducted comparability assessments and process optimization projects, including a coiling efficiency improvement saving \$70,000/year.
- Performed data verification, statistical analysis, and trend reporting using Minitab, Excel, Pareto charts, and pivot tables.
- Authored packaging and material specification documents in SOLID-WORKS.

Prasad Lab for Materials Research Miami, FL

Aug. 2022 – Dec 2023

Researcher

- Conducted material synthesis, testing, and data analysis of biomaterials and PDMS composites for bioinspired and biomedical applications.
- Developed and validated sensors for real-time biological monitoring, integrating experimental data with statistical analysis (MATLAB, Arduino).

TECHNICAL SKILLS

- Quality Systems & Standards: ISO 13485, ISO 9001, FDA 21 CFR 820, MDSAP, EU MDR, GMP/QSR
- Tools: Teamcenter, Polarion, SAP, ETQ Reliance, Minitab, Excel (pivot tables, statistical analysis), Word, PowerPoint, SOLID-WORKS
- Core Competencies: CAPA, NCR, SCAR, Root Cause Analysis, Supplier Quality, SPC, FMEA, Validation (IQ, OQ, PQ), Complaint Investigations, Process Improvement, QMS Audits, Change request, Change Notifications

PROJECTS

Hexaflow, Bone Marrow Aspiration Needle Miami, FL

Jan. 2023 – Dec 2023

Project Manager/ Documentation Control

- Secured \$60,000 sponsorship by effectively communicating technical and testing requirements.
- Managed verification protocols, reports, and engineering studies across multidisciplinary systems.
- Led creation of Design History File (DHF) and Device Master Record (DMR) in compliance with FDA and ISO requirements.

Engineering Outreach & Leadership Miami, FL

Aug. 2021 – Dec 2023

SWE/BMES Representative

- Presented biomedical engineering projects to 1,500+ K-12 students at FIU's Engineering Expo.
- Shared personal insights in an engineering panel on navigating an engineering career as an immigrant, and provided ongoing 1-on-1 mentorship via coffee chats to help peers find their own path.
